Environmental Law Program Colloquium Series

Professor Fred Bosselman
Illinois Institute of Technology Chicago
Kent College of Law

Hawai‘i’s Energy Plan:
Akamai or Lōlō?

Wednesday, February 29, 2012
12:00 pm – 1:00 pm, CR1
Light refreshments will be provided beginning at 11:45 am.

Professor Fred Bosselman is a Professor of Law Emeritus at the Illinois Institute of Technology Chicago Kent College of Law and specializes in energy and environmental law. He is co-author of the casebook Energy, Economics and the Environment and the books The Role of Customary Law in Sustainable Development and Managing Tourism Growth. He is a member of the board of the Sonoran Institute and the Santa Lucia Conservancy and formerly served on the board of directors of the National Audubon Society and as president of the American Planning Association.

Prof. Bosselman looks at Hawai‘i’s state energy plan, which seeks to generate 40% of the state’s energy from renewable resources. Prof. Bosselman questions: has the plan considered the land use, cultural, and environmental impact of such massive development? Should energy efficiency be given stronger emphasis? Aren’t there opportunities for conservation, even at UH?

Please email elp@hawaii.edu to RSVP. Video of the event will be posted on our website (http://hawaii.edu/elp) at a later date.

Environmental Law Program Faculty and Research Associates:
Interim ELP Director David Forman
Chris Odoca, Brent Kakesako, Onaona Thoene, & Teri Wright
